U.S. Army To Build Temporary Hospitals For Coronavirus Patients In Stony Brook, Old Westbury

TIMOTHY BOLGER MARCH 23, 2020

ASPEQ Heating Group is supporting the COVID-19 emergency response effort by providing quick-ship electric duct heaters for field hospitals in NY. Our factories are fully operational and observing the latest CDC guidelines on social distancing and sanitation. At ASPEQ, we are aligning all human and material resources to place the highest priority on projects such as these, and we hope and pray for the safety of those on the front lines of this pandemic where our products will be utilized.

The Cuba ASPEQ Team maintains social distancing while posing with 20 of the 44 heaters they have completed for the construction of a medical facility at the State University of New York at Stony Brook.
